

CLP recently teamed up with community groups to host two festive gatherings. Participants enjoyed hands-on workshops where they made vegetarian pizzas and crafted traditional piglet mooncakes. These activities not only introduced green living concepts but also embraced a spirit of inclusion, filling the celebrations with laughter and warmth.

**Golden Piglet Mooncake Inclusive Making Workshop**

We partnered with Gingko House for a Golden Piglet Mooncake Inclusive Making Workshop, welcoming friends from the Hong Kong Society for the Blind. Together, we made this classic Mid-Autumn treat that's all about togetherness. Everyone also had explore "Protactile Language," which facilitated communication between our visually and hearing-impaired friends and other participants. This was a simple yet effective way to break down barriers and foster understanding, making the festival feel extra cozy!

**Spooky Pizza Farm Fest – Inclusive Halloween Party**

This Halloween, we collaborate with New Zealand Organic Farm and the Hong Kong Down Syndrome Association to invite families and friends from diverse backgrounds to spend a day at the farm. Everyone rolled up their sleeves to knead dough and selected the freshest ingredients to create their very own vegetarian pizzas! The lively atmosphere was embraced by Halloween costumes and icebreaker games, filling the day with endless laughter. Through the activities, participants learned eco-friendly tips and experienced sustainable living, making this Halloween's vegetarian pizza not just a treat, but a memorable, love-filled, inclusive experience!

Washer-dryer combos have become a popular choice for modern households, but myths about their performance still linger. Let's set the record straight and discover how to save energy while keeping your laundry fresh and clean.

**1. Why Do "Energy-Efficient" Washer-Dryers Sometimes Use More Power?**

Energy efficiency isn't one-size-fits-all. The same machine can perform very differently depending on the fabric and program selected. For instance, cotton cycles may wash efficiently, but drying can demand far more electricity. When choosing a washer-dryer, think about your laundry habits and compare the energy ratings of different settings—not just the overall label.

**2. Does Hot Water Always Mean Cleaner Clothes?**

Hot water doesn't improve cleaning results, and high-temperature cycles consume excessive electricity. For laundry that's both fresh and eco-friendly, the key is to sort garments by fabric type and soil level, then select the most appropriate wash program.

**Open a BEA GOAL Account to Pay Your Electricity Bills and Enjoy up to HK\$400 in Extra Rewards**

Pay your electricity bills and enjoy more rewards! From now until 31 December 2025, CLP customers who open a Bank of East Asia (BEA) GOAL account to pay their CLP electricity bills can enjoy HK\$400 additional rewards, plus the chance to receive welcome offers worth up to HK\$1,530!

Skip the queues and save time and money when paying your CLP bills. Act now to enjoy these exclusive rewards:

1. Successfully open a BEA GOAL account with promo code "BEACLPGO" and pay your CLP electricity bill via BEA mobile banking or online banking to get HK\$100 rewards! \*
2. Successfully set up Direct Debit Authorisation (DDA) to receive extra HK\$300 rewards!\*

Furthermore, by depositing new funds and meeting specified requirements, customers can receive welcome offers worth up to HK\$1,530^.

Paying your electricity bills is now easier and more cost-saving. Open an account today and start earning rewards!

\* Additional rewards are available on a first-come, first-served basis until the quota is full.

^ Offers are subject to terms and conditions.

CLP's flagship event, the Smart Energy Award Ceremony, concluded successfully on the 24th October. Under the theme #GOal to Carbon Neutrality, the awards recognised the businesses and organisations from the commercial, industrial, public utilities, and services sectors for their contributions and achievements in low-carbon transformation. The winning organisations have driven progress towards carbon neutrality through diverse innovative solutions and smart technologies in energy management and carbon reduction. Their success stories were also showcased at the on-site "#GOal to Carbon Neutrality Exhibition Gallery"!

We were honoured by the presence of the Energy Advisory Committee Chairman, Professor Simon Wong, who joined the CLP management team to inaugurate the event. The ceremony was met with great enthusiasm, bringing together industry leaders to celebrate this shared success and joy.

We look forward to more organisations joining the efforts in energy saving and carbon reduction. Together, we accelerate Hong Kong's transition towards carbon neutrality!

**Q** I've been collecting Domeo points to redeem rewards in the Domeo platform. Is there a way to earn points faster to get more rewards?

**A** Absolutely! Simply download the CLP App and log into your CLP One account to participate in the Eco Fun interactive game. You can earn points daily. By playing the game for 18 consecutive days, you can earn up to 250 Domeo points!

- Earning points daily is easy:
- Get a +1 Domeo point daily login bonus for logging in once a day
  - Complete the "daily task" and "daily quiz" to earn +5 Domeo points each
  - Reach higher game levels to receive bonus Domeo points.

Playing the Eco Fun mini game not only helps you earn points daily but also deepens your understanding of green living and community care.
