

PAPERLESS LOVE TREE AI CREATIVE LINGS CONTEST

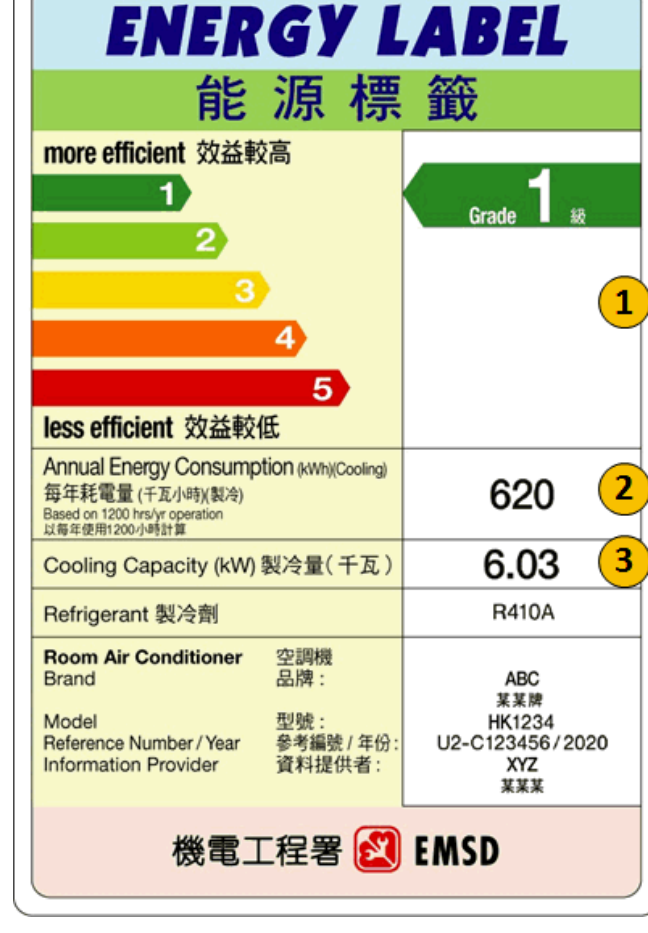

AI is not only a tool that supports children's learning but also helps them express their creativity and imagination. CLP and My Treelings are launching the "Paperless Love" Creative AI Treelings Contest, inviting Hong Kong primary school to blend eco-friendly ideas with their AI skills to create paperless everyday scenarios for the Treelings.

The contest centers on the theme of "Paperless Love". Contestants are required to use AI tools to create a scenario and story that show the Treelings living sustainably. The scenario may be set in daily life, a nature environment, a future city, at school, or even a fantasy world, as long as it gets across the message of "Paperless Love", including:

- Caring for the planet and its resources
- Adopting a paperless lifestyle (e.g. using eBills)
- Supporting a sustainable future

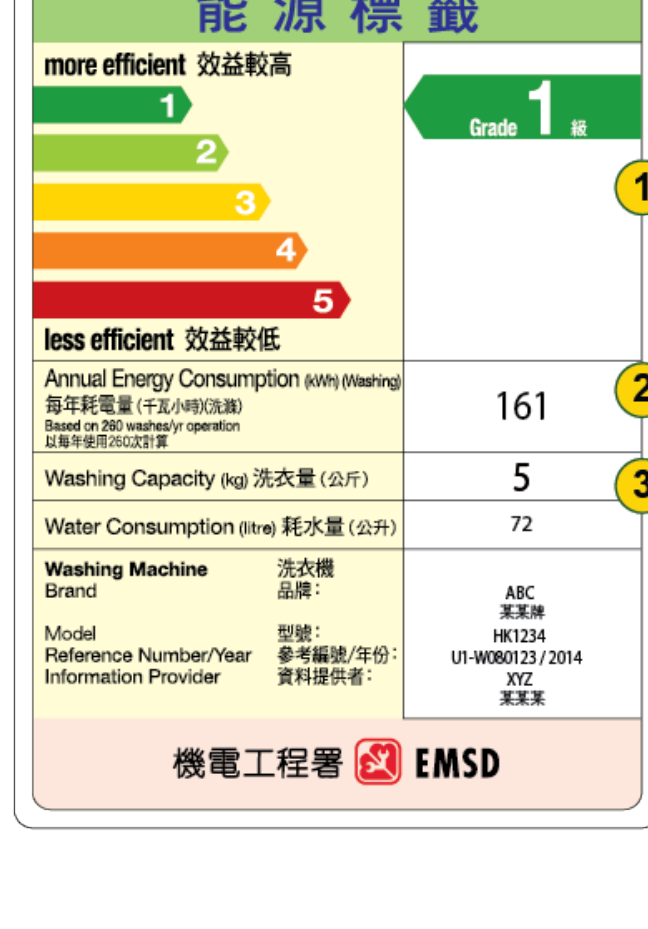

Every appliance claim efficiency—but which performs best? Check the energy label to choose smarter air conditioners, washing machines, and dehumidifiers.

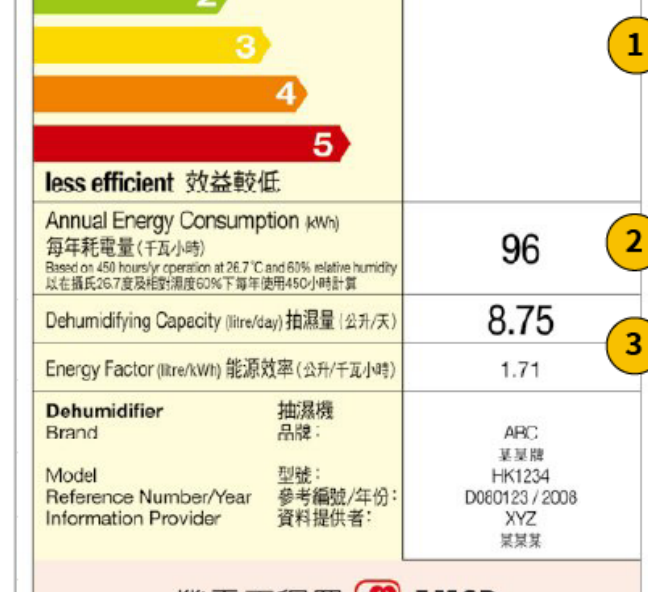

Air Conditioners

1. Choose Grade 1 air conditioners. Split-type air conditioners with a Grade 1 energy label can save up to approximately 50% in annual electricity costs compared to Grade 3 models. *# ([Learn More](#))
2. Compare power consumption and estimate annual energy use.
3. Calculate efficiency (cooling capacity ÷ hourly power); a higher value means greater efficiency.
4. If your household has more members or you spend more time at home during summer, it's recommended to choose a Grade 1 model with a higher energy efficiency ratio.

Washing Machines

1. Select Grade 1 washing machines. Washing machines with a Grade 1 energy label can save up to approximately 80% in annual electricity costs compared to Grade 3 models. *# ([Learn More](#))
2. Compare the water consumption figures for each machine. The higher the number, the more water it consumes.
3. For larger households, avoid low-capacity machines and choose ones matching your laundry volume.

Dehumidifiers

1. Choose Grade 1 dehumidifiers. Dehumidifiers with a Grade 1 energy label can save up to approximately 50% in annual electricity costs compared to Grade 3 models. *# ([Learn More](#))
2. Compare power use and estimate annual energy consumption.
3. Pick models with high dehumidifying capacity and efficiency—higher values mean faster, more effective moisture removal.
4. For homes near the sea or hills, opt for higher-capacity Grade 1 models to avoid overloading in spring and summer.

* Based on EMSD Mandatory Energy Efficiency Labelling Scheme website listed models (May 2025).

Electricity costs are estimated based on CLP's 2025 average net tariff and are for reference only.

If you've got an electricity bill coming up and you're weighing your payment options, ePay Boy is back with another Fubon offer.

Check out these sweet deals* available to Fubon Bank account and credit card users from 1 May 2026 to 31 December 2026:

First-time payments using Fubon Bank online or mobile banking "Bill Payment" or FPS function	• 25,000 Fubon Bank credit card points • HK\$50 cash rebate for users without a Fubon Bank credit card
Non-first-time payments using Fubon Bank online or mobile banking "Bill Payment" or FPS function	• 10,000 Fubon Bank credit card points • HK\$20 cash rebate for users without a Fubon Bank credit card

From now until 31 December 2026, apply for a Fubon Visa Platinum Credit Card via the Fubon GO mobile app or the Fubon Bank website, meet the relevant requirements, and enter the exclusive CLP customer promo code "CLPFB" — You can enjoy a HK\$300 cash rebate!

*Limited quota, first-come, first-served. Offers are available while stocks last.

One app is all you need. Download the CLP App, link it to your CLP One account, and enjoy convenient features that help you stay connected—anytime, anywhere.

1. Pay Bills Anytime, Anywhere

View all your billing details, due dates, and payment history in one place. Make instant payments directly in the app via FPS, PPS, and more.

2. Easily Track Your Electricity Usage

Monitor your energy consumption with detailed records and trends, including hourly insights to help you stay in control.

3. Large Font Mode for Better Readability

The CLP App includes a Large Font Mode. Simply enable it in "App Settings" to make all content clearer and easier to read.

4. Manage Family Accounts in One Place*

Simply log in to the CLP App, tap "Discover" at the bottom right, and select "Manage Your Services" (Add Associated Account). By linking your family members' electricity accounts to your CLP App, you can easily manage and pay bills on their behalf—no more hassle.

* This feature applies when both the primary account and the associated account have a CLP One account.
