

Energy for Brighter Tomorrows

May 2020

CLP SMART ENERGY AWARD

2020 Open for Entries Now

CLP supports all businesses and organisations
in taking measures to save energy.

How can large corporations use innovation
and the latest technology to improve their energy efficiency?

Let's take a look at the smart solutions embraced by corporate
and government bodies in the 2019 Smart Energy Award programme.
Don't miss the chance to join this year and share your own success story.

2019 Winners' Stories

(Corporate / Government Bodies)

Energy Saving Performance Excellence Award

Hospital Authority - Caritas Medical Centre, Kowloon West Cluster

The Caritas Medical Centre adopted the recommendation from a free CLP Energy Audit that carried out retro-commissioning (RCx) projects to optimise the energy efficiency of the hospital's central air-conditioning system. The investment in RCx was relatively small but saved up to 700,000kWh per year. The pioneering project is a showcase for the industry.

Hong Yip Service Company Limited - Park Central

康業服務有限公司
Hong Yip Service Company Ltd.

Property Management company Hong Yip strives to enhance energy efficiency in its operations. It successfully installed six high energy efficient chillers and more than 9,000 LED lamps to replace existing chillers and lights in Park Central, a mixed-use building comprising residential units and a shopping mall, and saved more than 4 million kWh of energy. It saved additional electricity by installing smart sensors which adjust air-conditioners and lighting systems to match actual demand.

Smart Technology Grand Award

Kai Shing Management Services Limited V city

Kai Shing Management implemented retro-commissioning projects in its V city shopping mall, allowing it to save up to 50,000 kWh per year by installing inverters in the ventilation system to match use with demand. The company also optimised the control and setting of central air-conditioning system based on the findings of big data analytics, which is expected to save hundreds of thousands of electricity per year.

Radio Promotion

LHGroup

The LH Group installed an intelligent Fan Coil Unit control system in one of its restaurants. The system uses AI video Analytic technology together with an existing CCTV system to adjust the fan speed and temperature according to customer occupancy and distribution. The system not only saves around 30% of energy consumption but also improves the customer experience.

Renewable Energy Excellence Award

Sino Estates Management Limited

SINO ESTATES MANAGEMENT
信和物業管理

Sino Estates Management Limited has installed more than 1,800 solar panels in 15 properties under its management, generating a total rated power of more than 590 kW. With a smart energy management system, technicians can monitor and manage the performance and operation of solar panels real time. The company joined the CLP Renewable Energy Feed-in-Tariff scheme to contribute to renewable energy generation in Hong Kong.
