## Programme Timeline

## 2020 Winners' Stories

### Encouraging Smart Energy Solutions

There has been an encouraging increase in the use of smart technology and devices to improve the operational and energy efficiency of businesses. Be inspired by the success stories of the 2020 Smart Technology Award winners and their innovative, energy-saving ideas.

### Smart Technology Award Winners

#### Corporate / Government Bodies

#### SMEs / NGOs / Education Institutes

Hong Kong Aircraft  
Engineering Company Limited

The Hong Kong Award for  
Young People

ARA Asset Management  
(Fortune) Limited - Metro  
Town Shopping Mall

Mammy Pancake

Sino Estates Management  
Limited — Olympian City 3

## Smart Technology Grand Award The Hong Kong Award for Young People (AYP)

AYP teamed up with CLP to set up an E-Playground in their training camp. The E-Playground includes a variety of interactive game facilities to help young people understand the principles of power generation and to strengthen their environmental awareness. The camp also installed an intelligent air-conditioning management system in the dormitories for greater energy management in its daily operations. It can also provide young people with a comprehensive STEM experience.

## Smart Technology Grand Award Hong Kong Aircraft Engineering Company Limited (HAECO)

HAECO made intelligent use of smart technology to improve its operational and energy efficiency, including replacing water-cooled chillers with more efficient models, storing energy with Phase Change Materials (PCMs), and optimising the system's operations and settings. This resulted in energy savings of around 5.4GWh a year.

**Smart Technology Excellence Award  
Sino Estates Management Limited  
– Olympian City 3**

Sino Estates Management Limited worked with smart technology partner on a retro-commissioning project to enhance the air-conditioning system at the Olympian City 3. Artificial intelligence and big data analytics were used to adjust the central system's optimal chiller operation mode, improving its energy efficiency and reducing electricity consumption by approximately 10%.
