

CLP Eco Charge 2.0

To promote low-carbon driving, CLP provides reliable and clean power for electric vehicle (EV) charging in carparks. In support of the Government's newly launched EV-charging at Home Subside Scheme (EHSS), we advanced our Eco Charge 2.0 to provide one-stop services to EV users.

Service Scope

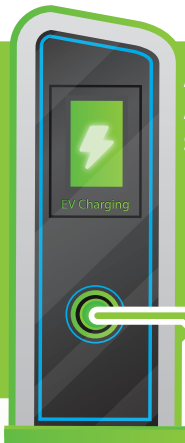

Free preliminary assessment of power supply capacity

Technical advice on power upgrading works

Technical advice on meter installation

Apply for Preliminary Assessment of Power Supply Capacity

Submit online application

Preliminary assessment by CLP

Receive assessment results for EHSS application
