

CLP Renewable Energy Feed-in Tariff

Powering a Smarter and Greener Tomorrow

We are entering an exciting era of smart use of energy. Everyone of us can play a part – big or small – in combating climate change. Sign up for the Renewable Energy Feed-in Tariff (FiT) today and build a sustainable future together.

Renewable Energy Made Easy

You can take part in the scheme by installing a solar and/or wind power renewable energy system on your premises. Once the system is successfully connected to the CLP grid, you can earn FiT payments.

How Will I Benefit?

CLP will buy the electricity generated by your renewable energy system at a FiT rate and the amount will be reflected in your regular electricity bills.

Types of FiT Rates

Three types of FiT rates will be offered according to the generation capacity of your renewable energy system:

Capacity of the Renewable Energy System	⚡ ≤10kW	⚡ >10kW - ≤200kW	⚡ >200kW - ≤1MW
FiT Rate [^] (per unit of electricity – kWh)	HK\$5	HK\$4	HK\$3

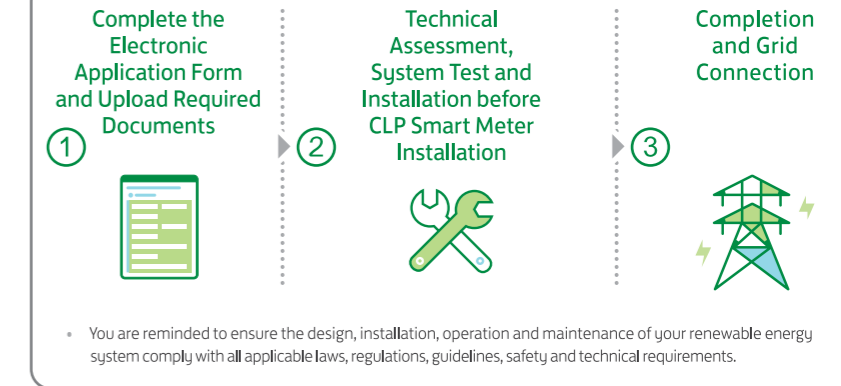

[^]The rates listed above are effective from 1 October 2018 onwards and will be reviewed regularly.

Thinking of Going Renewable?

You can take part in this scheme if:

- You are a registered CLP account holder
- Your renewable energy system is powered by solar and/or wind and is located on your premises with a total generation capacity of up to 1MW
- Your renewable energy system can be connected to the CLP network without any increase in capacity or network reinforcement work by CLP

We Make the Process Simple

It's Easy to Get Started

To apply, simply complete the electronic application form on the CLP website or CLP App and upload required documents.

Download for Android

Monitor Your Renewable Energy System Smartly

You can monitor your system on the CLP website or CLP App to view the amount of electricity generated hourly.
